

Database of Instruments for Resource Use Measurement

Visit us at: www.DIRUM.org

DIRUM — the Database of Instruments for Resource Use Measurement — is a practical, open-access database of resource-use instruments based on patient recall, for use by trial health economists

DIRUM is funded by the Medical Research Council Network of Hubs for Trials Methodology Research in order to:

- Catalogue resource use measures for the UK, US, Canada and Australia
- Establish a repository of empirical evidence on the validity and reliability of resource use instruments

A photograph showing a person's hands filling out a form in a spiral notebook. The person is wearing a dark long-sleeved shirt. The form has various checkboxes and text. The background is a light green curved shape.

Submit your resource use instrument to: info@dirum.org
